## TransEdit MMC [Win/Mac] (Latest)

The TransEdit add-on consists of two parts: 1. The free TransEdit Software Demonstration, which gives you an overview of the technologies included in DVBViewer and TransEdit, along with a tour through the program interface 2. TransEdit Pro, the DVBViewer Pro add-on, which is a comprehensive backend DVB-GUI for DVBViewer Pro. TransEdit Pro is the real add-on and gets you more features and abilities than TransEdit Demonstration. Features: DVBViewer Pro provides tools to scan for available DVB-TV channels and to synchronize your DVB card. DVBViewer Pro can also synchronize for analog TV and DAB-TV, to manage your TV card and to watch TV with the stand-alone DVBViewer Pro application. TransEdit Pro offers the same basic features of TransEdit Demonstration, plus also additional functionality to get even more channels available on your TV-Tuner and DVB card, manage your TV card, even more to synchronize your card and a comprehensive back end DVB-GUI for DVBViewer Pro. TransEdit Demonstration and DVBViewer Pro can be used at the same time. In addition, TransEdit Pro can be used as a stand-alone application to scan for available DVB channels, as well as to synchronize your DVB card. TransEdit Pro is the real add-on and gets you more features and abilities than TransEdit Demonstration. The TransEdit Pro Add-on enables all DVB-related features of DVBViewer and TransEdit for DVBViewer Pro, such as the DVBViewer's feature to scan for available DVB-channels and synchronize your DVB card, as well as synchronize for analog TV and DAB-TV, to manage your TV card and to watch TV with the stand-alone DVBViewer Pro application. No registration or licenses are necessary. TransEdit Pro runs under Windows XP, Vista or 7. ### What's New In?

# TransEdit, DVBViewer and MMC versions are build around the "same inbox". There is a second MMC version as well for the DVBViewer Pro which is provided by the company. That means, that TransEdit also adds a few features to the free version, which are required in the DVBViewer Pro. Requirements Requires DVBViewer 3.0.0 or later. How to install To install the add-on, please simply extract the zip package to your DVBViewer folder. Please make sure that the folder structure is intact. Features The TransEdit was designed to a tool that will administrate and update your channel lists. The free available version is some sort of technology demonstration in order to show you if the DVBViewer is able to deal with your DVB Card, while scanning works like charm and the save as well as the preview function are disabled. TransEdit is a free add-on exclusively for purchasers of DVBViewer Pro. The MMC version bases on the hardware engine which is also working inside the DVBViewer Pro. If Transedit works, also the DVBViewer will work. Requirements Requires DVBViewer 3.0.0 or later. How to install To install the add-on, please simply extract the zip package to your DVBViewer folder. Please make sure that the folder structure is intact.

---

**System Requirements For TransEdit MMC:**

Dependencies: SVGO - Git client for Windows, available from Java - OpenJDK Runtime Environment 7, available from Getting Started: To install the dependencies and start using the CLI, run the following from the root of your project: wget un
