If not, see filegive: been working on, I'd have put it up here because there is a slight chance there could be a voting error. Well, it didn't happen. The two of them had lost the election. It was the basis for an episode of the classic US TV show, The West Wing, when the leading characters discuss the potential for voting error on the air. A few months later, when Dr. Donnell stepped down, Dr. Corley was elected. At least that's the way it is here in New Zealand, and I think a similar thing may have happened in my province in Canada. But things can happen. The point here is that if the mathematical details of the election are given out, it's possible that things can happen. This is what makes some of the mathematical models useful -- they can say if something can happen, and it's therefore worth discussing. So, the example of the Mayan calendar is an interesting one. It suggests that the people who built it were aware 77a5ca646e
