Binary It is possible to get a copy of Adobe Acrobat XI Pro from the Adobe website. The Windows and Mac versions are available for purchase on the Adobe website. Acrobat XI Pro [x64bit] – Download Here. References External links Official site Official download site Acrobat XI Pro Category:PDF softwareQ: ERROR: The repository '' is not signed. I updated gradle to 1.4 and after this I am facing a problem when I try to build. The problem is the one stated in the title. I read here that I should install "Android studio plugin for JDK 8", so I installed it. After that I tried to build a gradle project but I got this error message. I tried to delete gradle folder and clear cache. Also I tried to build the project with cmd. But nothing worked. I am using IntelliJ IDEA and I am trying to build the project with an Ant build. Can anyone help me? A: I had this exact same problem on Windows 10 and resolved it by going to the gradle-wrapper.properties file and changing the path to point to the jcenter Maven repo instead of the jcenter local repo. The location of the file is C:\Users\YOUR_USER_NAME\AppData\Roaming\gradle-wrapper.properties Then save that file and everything is good to go. If you change that path on Android Studio you will need to close it and re-open it and that's when the settings are back to what they were. Hi, we need to change these deals to Oregon City Power. Please let me know if you have any questions. Thanks, Jennifer
